Description

EXPRESS LINE ENGINEERING AND TRADING CO. LTD. Is a limited Company engaged in Rubber Lining, Conveyor Belt Splicing and Maintenance, Plastic Welding, Drum Lagging, Sand Blasting and Industrial Painting, Supply of Skilled and Unskilled Labor. The Company with its qualified work force has been providing high quality service in the fields to our clients.

Our Mission and Purpose

With a strong commitment to total delivery in all spheres of our business engagements, the mission of EXPRESS LINE ENGINEERING is:
"To deliver a world class and high standard engineering services to the satisfaction of its clients"

Our Vision

Our aim amongst other goals is to provide the best engineering products and support services in West Africa and beyond and also support in the enhancement and development of the Engineering industry.

Our Values

Our dedication to quality services internally and externally, shared commitment to satisfaction and total delivery to all our clients are values that EXPRESS LINE ENGINEERING holds dear. We value our tradition of continually enhancing the services we represent with the view to improving both quality and impact.

Our willingness

At EXPRESS LINE ENGINEERING, we are flexible and responsive to the total needs of our clients. We communicate effectively our thoughts and ideas towards the development of services.

We maintain a business practice of wide stakeholder consultation with the sole goal of satisfying our clients. We insist on a participatory service development and delivery process with open minds and hands to explore every conceivable possibility.
At EXPRESS LINE ENGINEERING, we seek not to sell our services but businesses and organizations.

OUR SERVICE DEPARTMENTS

CONVEYOR BELT SPLICING AND MAINTENANCE

As Conveyor Belt Splicers, we answer our clients' demands and requests with efficiency and in record time with the best of expertise, professionalism and resources. Our highly trained Splicers have under extreme conditions succeeded in installing and maintaining all kinds of Conveyor Belt and thus guaranteeing our customers' trust and comfort.
Our experience in emergency helps us in providing design engineering assistance and maintenance for complex systems. We ensure that your production target is not hindered by rampant conveyor belt problems.

We offer the following services on conveyor.
ii. Installing conveyor belt on newly constructed conveyors. (Hot and cold vulcanizing).
iii. Changing of old conveyor belt in the shortest possible time. (Hot and cold vulcanizing).
iv. Repairing of defective conveyor belt.
v. We also work on different kinds of mechanical fasteners.

RUBBER LINING

Our Rubber Liners offer creative and innovative rubber lining in launders, chutes, pipes, cyclones, agitators, tanks, etc. to the highest technical specification. With our knowledge, background and experienced engineers our capabilities in the execution of contracts are unlimited.

EXPRESS LINE ENGINEERING & TRADING COMPANY LTD.

ABBRASIVE BLASTING, PAINTING AND SPRAYING

Our staffs have a broad practical industrial experience most of who have worked in some of the biggest industries in Ghana and abroad. We operate on a solid quality assurance system and committed to total customer satisfaction. Operating with a lot of experience and completed lots of layout projects, we take pride in delivering high quality service on time, every time. We love what we do and it shows.

EXPRESS LINE ENGINEERING LABOUR SUPPLY

EXPRESS LINE ENGINEERING provides a wide range of hands and minds to achieve your corporate goal of an efficient, effective and an economical service that is first-rate and provides a competitive advantage for our clientele.

EXPRESS LINE ENGINEERING provides you with services of key staff to provide leadership on a day-to-day basis and other staff and a consultant to provide the required mix of experience and quality for identifiable projects and services.

In addition to the typical services you will find at EXPRESS LINE ENGINEERING, we also offer consultation on various engineering products as the need may arise for the client.

BACKED BY KNOWLEDGE

Behind everything we do – with every service provide - we use our finely honed technical knowledge and management capabilities to assure faster, higher quality and effective service delivery.

We are continually developing new ways to capture and deliver products and ideas.

STANDARDS AND ABILITY.

At the receiving end of the services of EXPRESS LINE ENGINEERING you can count on the highest professional standards and the ability to deliver on our services effectively and honestly.

Supporting our Clients .

Today, a working environment that promotes innovative thinking, continuous learning and leadership development and rewards performance is not sufficient. It must include a conscious effort to provide a kind of orientation that keeps businesses in business.

EXPRESS LINE ENGINEERING provides such services to clients at the least business relationship.
Resource Profile
Our success remains the product of an honest, committed and a dedicated team, with each player experienced enough to deliver unparalleled quality to our clients.

EXPRESS LINE ENGINEERING assembles for each task irrespective of size and content, a multifaceted and interdisciplinary team of well trained and relevantly experienced staff to deliver products that work. In deciding what goes into a product or service to be delivered to a client, WE follow a consistent and a predictable set of interrelated processes and methods.
Express Line couples these with a detailed understanding of the client's business needs and industry standards to deliver.

SOCIAL AND CORPORATE RESPONSIBILITIES

EXPRESS LINE ENGINEERING is committed to and abides by the ideal of a socially conscious and a responsible corporate entity.
We believe in and have discharged our obligations under the laws of the Republic of Ghana as regards taxation and other levies and under social contracts which expects us to make contributions to the social good in the communities in which we operate.

OUR CLIENTS

Our priority is your satisfaction. The advantage of our professionalism and years of experience in the market. In addition, our trained staff take care of most of the fastest and most effective solutions to your contract. Of course there is the personal approach and high care.

We are dedicated to constant improvement and enhancement of our services. Each client is a valued customer, and an opportunity for us to improve the delivery of our services.

We have been involved in almost all the construction and expansion projects in the various mining companies in Ghana for the past ten years. We also did all the rubber lining and conveyor belt splicing for Societe Mines de Syama in Mali and we are currently working with Semos Mines Sadiola in Mali.
